Direct Costs: \$41,662

Development and feasibility of a tailored decision-tree to address barriers to asthma follow-up care

Role: Principal Investigator (Co-Investigators: John Piette, Alan Baptist, Marc Hershenson)

The major goals of this project are to ascertain specific barriers to asthma follow-up care, implement a quality improvement collaborative, and develop and evaluate a decision-tree with brief evidenced-based interventions tailored to frequently cited barriers that can be integrated into the process of patient follow-up to improve no show rates.

6/1/15 – 8/31/17

1R21 HS23786-01

AHRQ

Direct Costs: \$299,975

Feasibility of a communication training program to improve patient-provider communication with electronic medical record

Role: Principal Investigator (Co-Investigators: Kai Zheng)

The major goals of this project are to develop and assess the preliminary efficacy of a behavioral training program for physicians working with electronic health records during the clinical visit using the Physician Asthma Care Education program framework.

1/1/15 – 7/31/16

Pilot funds from P30DK092926- Michigan Center for Diabetes Translational Research

NIDDK/NIH

Direct Costs: \$49,948

Feasibility of pre-visit screening of diabetes-related financial burden on care outcomes

Role: Principal Investigator (Co-Investigators: Michele Heisler, Ken Resnicow)

The major goal of this project is to develop a screening tool for diabetes-related financial burden in primary care settings and assess the preliminary efficacy of screening on outcomes.

7/1/15 – 12/31/15

Askwith Funds for Asthma and Allergy Research

Direct Costs: \$9,440

Exploring global perspectives on the management of pediatric asthma in the community pharmacy setting

Role: Principal Investigator (Co-Investigators: Amanda Elaro, Sinthia Bosnic-Anticevich)

The major goals of this project are to explore the current attitudes, behaviors, levels of confidence and self-reported pediatric asthma management practices of community pharmacists in the United States, and to conduct a trans-national comparison between community pharmacists practicing in the United States and Australia in the field of pediatric asthma in order to assess preliminary feasibility of pharmacy asthma education initiatives.

7/1/12 – 7/30/13

American Lung Association

Direct Costs: \$21,000

Financial burden and cost communication in the care of African American women with asthma

Role: Principal Investigator

The major goal of this project was to describe clinical and socio-demographic characteristics of African American women who perceive financial burden in managing their asthma, and relationships between communicating about cost concerns in the clinical encounter, self-management behaviors and urgent care use in this population
